Product Back-Log

This is a list of all tasks that must be done to complete a particular function of the application (e.g., design and make the online database, design and develop the rest API, test database, test rest API etc). The team will need to fill the role of the product owner and manage the backlog throughout the project.

ID	Task
1	Gather 20 Subject Files with Necessary Data (Item Number, Object Class, Containment Procedure, and Description)
2	Gather (Download) Subject File Images
3	Convert Downloaded Subject File Images to a Standard Format
4	Gather Tutorials (Removing Unnecessary React App Files Tutorial, React Router Tutorial, useState and useEffect Tutorial, RestDB Tutorial, and Deploying a Website to Netlify Tutorial)
5	Gather Necessary Files (Assignment 1 CSS, Logo, and Font Files)
6	Utilize Assignment 1 CSS File to Design a Website Template
7	Create a React Application Template
8	Remove Unnecessary React App Files
9	Copy CSS, Logo, and Font Files to Project
10	Copy Converted Subject File Images to Project
11	Setup Project Files (index.html, App.js)
12	Begin Setup for Navigation Menu Sidebar
13	Create JSON File Containing Data (20 Subject Files)
14	Create RestDB Database
15	Create CORS API key
16	Upload JSON File to Database
17	Create Read-DB JS file for Subject Files
18	Finish Setup for Navigation Menu Sidebar
19	Create Navigation Menu Search Functionality
20	Perform Code Clean-up
21	Organize Project Files

22	Create GitHub Repository
23	Upload Project to GitHub Repository
24	Deploy Website to Netlify
25	Create Test Cases
26	Conduct Test Cases

Sprints

Organise agile 'sprints' to complete each product backlog before release deadline (assignment due date). Add the tasks for the sprint onto your project management board, assign team members to task and set schedule dates. Use checklist to breakdown tasks as required.

MS Planner Link

Sprint 1

Title	Resources and Setup	Start	02/05/2022	End	23/05/2022	Completed	04/05/2022
ID	Task						Status
1	Gather 20 Subject Files with Necessary Data (Item Number, Object Class, Containment Procedure, and Description)						Completed
2	Gather (Download) Subject File Images						Completed
3	Convert Downloaded Subject File Images to a Standard Format						Completed
4	Gather Tutorials (Removing Unnecessary React App Files Tutorial, React Router Tutorial, useState and useEffect Tutorial, RestDB Tutorial, and Deploying a Website to Netlify Tutorial)						Completed
5	Gather Necessary Files (Assignment 1 CSS, Logo, and Font Files)						Completed
6	Utilize Assignment 1 CSS File to Design a Website Template						Completed
7	Create a React Application Template						Completed
8	Remove Unnecessary React App Files						Completed
9	Copy CSS, Logo, and Font Files to Project						Completed
10	Copy Converted Subject File Images to Project						Completed

Sprint 2

Title	Creation	Start	24/05/2022	End	06/06/2022	Completed	13/05/2022
ID	Task						Status
11	Setup Project Files (index.html, App.js)						Completed
12	Begin Setup for Navigation Menu Sidebar						Completed
13	Create JSON File Containing Data (20 Subject Files)						Completed
14	Create RestDB Database						Completed
15	Create CORS API key						Completed
16	Upload JSON File to Database						Completed
17	Create Read-DB JS file for Subject Files						Completed
18	Finish Setup for Navigation Menu Sidebar						Completed
19	Create Navigation Menu Search Functionality						Completed
20	Perform Code Clean-up						Completed
21	Organize Project Files						Completed

Sprint 3

Title	Deployment and Testing	Start	08/06/2022	End	17/06/2022	Completed	31/05/2022
ID	Task						Status
22	Create GitHub Repository						Completed
23	Upload Project to GitHub Repository						Completed
24	Deploy Website to Netlify						Completed
25	Create Test Cases						Completed
26	Conduct Test Cases						Completed

Testing

Ensure adequate testing has been conducted for all application functions, this may be included on your project board.

Test Case Layout

This is a list of all the rows on the test case table and their purpose.

Row Number	Purpose
1	Test Case
2	Expected Result
3	Result (Y / N / N.A)
4	Comments
5	Evidence

Devices

This is a list of all devices utilized for the testing of the website.

Device Name	Resolution
Custom PC	2560x1440
Samsung Galaxy Note 9	360x740

Web Browsers

This is a list of all browsers utilized for the testing of the website.

Desktop
Google Chrome
Microsoft Edge
Mozilla Firefox
Mobile
Google Chrome
Mozilla Firefox
Samsung Internet

Desktop

Google Chrome

Standup Meetings

Regular 'stand-up' meetings (these are team meetings to discuss progress on each sprint), include evidence of these on your project board

Standup Meeting 1

Meeting Date	11/05/2022	Attendants	Codie Shannon Bruce Tuhakaraina
Recap			
<p>In this stand-up meeting Codie showed the product owner Bruce, the organized agile sprints, alongside the majority of the product that had been completed. Codie also discussed with Bruce the tools utilized for development of the project such as the tool utilized to organize the agile sprints, and the database utilized to store the data for the subject files. Alongside this, Codie and Bruce also discussed the remaining segments of the project that must be completed which includes organizing the project files, performing code clean-up and testing, alongside creating the agile scrum documentation.</p>			

Standup Meeting 2

Meeting Date	16/05/2022	Attendants	Codie Shannon Bruce Tuhakaraina
Recap			

In this stand-up meeting Codie showed Bruce the completed product. Bruce also commented that Codie is on track with the project.

Standup Meeting 3

Meeting Date	23/05/2022	Attendants	Codie Shannon Bruce Tuhakaraina
Recap			
In this stand-up meeting Codie clarified with Bruce a product misunderstanding. Alongside this, Codie and Bruce discussed the remaining segments of the project to be completed which includes testing the product and creating the agile scrum documentation for the project.			

Sprint Review

A sprint review is potentially which went right with a particular sprint, what didn't go right or didn't get completed, so that it was added to the next sprint.

Sprint Review 1

Title	Resources and Setup	Start	02/05/2022	End	23/05/2022	Completed	04/05/2022
Recap							
All tasks were completed ahead of the end date and no problems occurred during this sprint.							

Sprint Review 2

Title	Creation	Start	24/05/2022	End	06/06/2022	Completed	13/05/2022
Recap							
All tasks were finished ahead of the end date and no problems occurred during this sprint. However, an unforeseen task was added to this sprint which was the Create Navigation Menu Search Functionality task.							

Sprint Review 3

Title	Deployment and Testing	Start	08/06/2022	End	17/06/2022	Completed	31/05/2022
Recap							
All tasks were completed before the end date. However, some unforeseen problems did arise during the Netlify deployment stage of the sprint which were easily fixed after combatting the deployment issues for a short period of time.							

Sprint Retrospective

A sprint retrospective includes a review of the entire process.

Overall, the recursive nature of the agile scrum process ensured the project was developed with overwhelming success. Along the way, a search feature was added to the product to ensure the accessibility of product items. Alongside a few problems arising with deployment of the product which were easily fixed after combatting the deployment problems for a short period of time.
